

Reading The Mind in The Eyes: Score Sheet

For each of the eyes, choose the word that best describes what the person is thinking or feeling.

A typical score is in the range of 22-30. If you scored over 30 you are very accurate at decoding a person's facial expressions around their eyes. A score under 22 indicates you find this quite difficult.

Correct answers

1. Playful
2. Upset
3. Desire
4. Insisting
